Plant Science, 80 (1991) 213–214
Elsevier Scientific Publishers Ireland Ltd.

Subject Index

Volume 80 (1991)

Agrobacterium rhizogenes, expression, polyamine biosynthesis inhibitors, polyamine accumulation, floral development, sexual organogenesis, conjugated polyamines, 131
Agrobacterium rhizogenes, flowering, male sterility, polyamines, polyamine conjugates, Ri TL-DNA, *rolA*, 145
Anther, pollen, genes, molecular, 167
Arabidopsis thaliana, gene fusions, gene tagging, plant mutants, T-DNA, transformants, 27
Asparagus officinalis, dioecy, sex, 67

Cloned genes, flower pattern, homeotic and heterochronic mutants, genetic models, 7
Cloning, sex genes, monoecious plant, strategy, 39
Cloning strategies, *Melandrium album*, dioecious, sex determination and differentiation, X and Y chromosomes, mutants, 93
Conjugated polyamines, *Agrobacterium rhizogenes*, expression, polyamine biosynthesis inhibitors, polyamine accumulation, floral development, sexual organogenesis, 131
Cytokinins, male sterility, specific markers of sterile lines, 107
Cytokinins, sex, hybridization kinetics, hormone-dependent genes, 49
Cytoplasmic male sterility, *Nicotiana*, restoration of fertility, mitochondrial DNA and RNA, sexual hybrids, somatic cybrids, 119

Developmental mutants, *Petunia*, floral development, homeotic mutants, transposon tagging, 19
Differential splicing, sex chromosomes, sex determination pathway, sexual differentiation, *Drosophila*, sex mutants, 201
Dioecious, *Melandrium album*, sex determination and differentiation, X and Y chromosomes, mutants, cloning strategies, 93
Dioecy, *Asparagus officinalis*, sex, 67
Dosage systems, *Rumex acetosa*, *Humulus*, sex chromosomes, sex determination, 79
Drosophila, sex chromosomes, sex determination pathway, sexual differentiation, sex mutants, differential splicing, 201

Expression, *Agrobacterium rhizogenes*, polyamine biosynthesis inhibitors, polyamine accumulation, floral development, sexual organogenesis, conjugated polyamines, 131

Floral development, *Agrobacterium rhizogenes*, expression, polyamine biosynthesis inhibitors, polyamine accumulation, sexual organogenesis, conjugated polyamines, 131
Floral development, *Petunia*, developmental mutants, homeotic mutants, transposon tagging, 19
Flowering, male sterility, polyamines, polyamine conjugates, *Agrobacterium rhizogenes*, Ri TL-DNA, *rolA*, 145
Flower pattern, homeotic and heterochronic mutants, genetic models, cloned genes, 7
Flower pattern, sex determination and differentiation, hermaphrodites, mono- and dioecy, homeosis, regulatory interlocks, molecular effectors, 1

Genes, anther, pollen, molecular, 167
Genetic models, flower pattern, homeotic and heterochronic mutants, cloned genes, 7
Gene fusions, *Arabidopsis thaliana*, gene tagging, plant mutants, T-DNA, transformants, 27
Gene tagging, *Arabidopsis thaliana*, gene fusions, plant mutants, T-DNA, transformants, 27

Hermaphrodites, sex determination and differentiation, flower pattern, mono- and dioecy, homeosis, regulatory interlocks, molecular effectors, 1
Homeosis, sex determination and differentiation, flower pattern, hermaphrodites, mono- and dioecy, regulatory interlocks, molecular effectors, 1
Homeotic and heterochronic mutants, flower pattern, genetic models, cloned genes, 7
Homeotic mutants, *Petunia*, floral development, developmental mutants, transposon tagging, 19
Hormone-dependent genes, sex, cytokinins, hybridization kinetics, 49
Humulus, *Rumex acetosa*, sex chromosomes, sex determination, dosage systems, 79
Hybridization kinetics, sex, cytokinins, hormone-dependent genes, 49
Hyphal growth factors, sex expression, siderophores/rhodotorulic acid, pathogenicity, *Silene alba*, *Microbotryum violaceum* (*Ustilago violacea*), 157

Male sterility, cytokinins, specific markers of sterile lines, 107
Male sterility, flowering, polyamines, polyamine conjugates, *Agrobacterium rhizogenes*, Ri TL-DNA, *rolA*, 145
Melandrium album, dioecious, sex determination and differentiation, X and Y chromosomes, mutants, cloning strategies, 93
Microbotryum violaceum (*Ustilago violacea*), sex expression, hyphal growth factors, siderophores/rhodotorulic acid, pathogenicity, *Silene alba*, 157
Mitochondrial DNA and RNA, *Nicotiana*, cytoplasmic male sterility, restoration of fertility, sexual hybrids, somatic cybrids, 119

Molecular, anther, pollen, genes, 167
Molecular effectors, sex determination and differentiation, flower pattern, hermaphrodites, mono- and dioecy, homeosis, regulatory interlocks, 1
Mono- and dioecy, sex determination and differentiation, flower pattern, hermaphrodites, homeosis, regulatory interlocks, molecular effectors, 1
Monoecious plant, sex genes, cloning, strategy, 39
Mutants, *Melandrium album*, dioecious, sex determination and differentiation, X and Y chromosomes, cloning strategies, 93

Nicotiana, cytoplasmic male sterility, restoration of fertility, mitochondrial DNA and RNA, sexual hybrids, somatic cybrids, 119

Pathogenicity, sex expression, hyphal growth factors, siderophores/rhodotorulic acid, *Silene alba*, *Microbotryum violaceum* (*Ustilago violacea*), 157
Petunia, floral development, developmental mutants, homeotic mutants, transposon tagging, 19
Plant mutants, *Arabidopsis thaliana*, gene fusions, gene tagging, T-DNA, transformants, 27
Pollen, anther, genes, molecular, 167
Pollen, sexual recognition, sporophytic incompatibility, polymerase chain reaction, transformation, 193
Polyamines, flowering, male sterility, polyamine conjugates, *Agrobacterium rhizogenes*, Ri TL-DNA, *rolA*, 145
Polyamine accumulation, *Agrobacterium rhizogenes*, expression, polyamine biosynthesis inhibitors, floral development, sexual organogenesis, conjugated polyamines, 131
Polyamine biosynthesis inhibitors, *Agrobacterium rhizogenes*, expression, polyamine accumulation, floral development, sexual organogenesis, conjugated polyamines, 131
Polyamine conjugates, flowering, male sterility, polyamines, *Agrobacterium rhizogenes*, Ri TL-DNA, *rolA*, 145
Polymerase chain reaction, pollen, sexual recognition, sporophytic incompatibility, transformation, 193

Regulatory interlocks, sex determination and differentiation, flower pattern, hermaphrodites, mono- and dioecy, homeosis, molecular effectors, 1
Restoration of fertility, *Nicotiana*, cytoplasmic male sterility, mitochondrial DNA and RNA, sexual hybrids, somatic cybrids, 119
Ri TL-DNA, flowering, male sterility, polyamines, polyamine conjugates, *Agrobacterium rhizogenes*, *rolA*, 145
rolA, flowering, male sterility, polyamines, polyamine conjugates, *Agrobacterium rhizogenes*, Ri TL-DNA, 145
Rumex acetosa, *Humulus*, sex chromosomes, sex determination, dosage systems, 79

Sex, *Asparagus officinalis*, dioecy, 67
Sex, cytokinins, hybridization kinetics, hormone-dependent genes, 49
Sexual differentiation, sex chromosomes, sex determination pathway, *Drosophila*, sex mutants, differential splicing, 201
Sexual hybrids, *Nicotiana*, cytoplasmic male sterility, restoration of fertility, mitochondrial DNA and RNA, somatic cybrids, 119
Sexual organogenesis, *Agrobacterium rhizogenes*, expression, polyamine biosynthesis inhibitors, polyamine accumulation, floral development, conjugated polyamines, 131
Sexual recognition, pollen, sporophytic incompatibility, polymerase chain reaction, transformation, 193
Sex chromosomes, *Rumex acetosa*, *Humulus*, sex determination, dosage systems, 79
Sex chromosomes, sex determination pathway, sexual differentiation, *Drosophila*, sex mutants, differential splicing, 201
Sex determination, *Rumex acetosa*, *Humulus*, sex chromosomes, dosage systems, 79
Sex determination and differentiation, flower pattern, hermaphrodites, mono- and dioecy, homeosis, regulatory interlocks, molecular effectors, 1
Sex determination and differentiation, *Melandrium album*, dioecious, X and Y chromosomes, mutants, cloning strategies, 93
Sex determination pathway, sex chromosomes, sexual differentiation, *Drosophila*, sex mutants, differential splicing, 201
Sex expression, hyphal growth factors, siderophores/rhodotorulic acid, pathogenicity, *Silene alba*, *Microbotryum violaceum* (*Ustilago violacea*), 157
Sex genes, monoecious plant, cloning, strategy, 39
Sex mutants, sex chromosomes, sex determination pathway, sexual differentiation, *Drosophila*, differential splicing, 201
Siderophores/rhodotorulic acid, sex expression, hyphal growth factors, pathogenicity, *Silene alba*, *Microbotryum violaceum* (*Ustilago violacea*), 157
Silene alba, sex expression, hyphal growth factors, siderophores/rhodotorulic acid, pathogenicity, *Microbotryum violaceum* (*Ustilago violacea*), 157
Somatic cybrids, *Nicotiana*, cytoplasmic male sterility, restoration of fertility, mitochondrial DNA and RNA, sexual hybrids, 119
Specific markers of sterile lines, male sterility, cytokinins, 107
Sporophytic incompatibility, pollen, sexual recognition, polymerase chain reaction, transformation, 193
Strategy, sex genes, monoecious plant, cloning, 39

T-DNA, *Arabidopsis thaliana*, gene fusions, gene tagging, plant mutants, transformants, 27
Transformants, *Arabidopsis thaliana*, gene fusions, gene tagging, plant mutants, T-DNA, 27
Transformation, pollen, sexual recognition, sporophytic incompatibility, polymerase chain reaction, 193
Transposon tagging, *Petunia*, floral development, developmental mutants, homeotic mutants, 19

X and Y chromosomes, *Melandrium album*, dioecious, sex determination and differentiation, mutants, cloning strategies, 93
